

# AVIRAL HARSH

**LinkedIn:** <https://www.linkedin.com/in/aviral-harsh->

**Email:** aviral.harsh1701@gmail.com

**GitHub:** <https://github.com/aviral-harsh>

**Mobile number:** +91 9153192393

## SKILLS

---

- **Core:** Python, C/C++, Java, DSA, OOP, DBMS, Computer Networks
- **AI/ML:** Artificial Intelligence, Machine Learning, Data Analysis, Python for AI
- **Additional:** HTML, CSS, JavaScript, Git/GitHub, VS Code

## PROJECTS

---

|                                                                                                                                                                                                                                                                                                                                                                                                                                        |             |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| <b>Farmers App</b>                                                                                                                                                                                                                                                                                                                                                                                                                     | <b>2026</b> |
| <ul style="list-style-type: none"><li>• Developed a project focused on helping farmers make better decisions when selling their crops.</li><li>• Designed the idea around comparing available mandi prices so farmers can evaluate different markets before selling their produce.</li><li>• Helped farmers identify a suitable mandi offering a better available price and reduce the chances of missing fair market value.</li></ul> |             |
| <b>Memory Vault</b>                                                                                                                                                                                                                                                                                                                                                                                                                    | <b>2025</b> |
| <ul style="list-style-type: none"><li>• Developed a privacy-focused web application for storing and managing personal memories.</li><li>• Designed a clean and user-friendly interface using HTML and CSS for organized memory management.</li><li>• Implemented interactive functionality with JavaScript to improve user interaction and usability.</li></ul>                                                                        |             |
| <b>Adaptive Haptic Alert System</b>                                                                                                                                                                                                                                                                                                                                                                                                    | <b>2025</b> |
| <ul style="list-style-type: none"><li>• Developed a smart vibration-based alert prototype using sensors and microcontrollers.</li><li>• Designed and assembled the physical circuit with battery integration for a functional prototype.</li><li>• Presented the working prototype, demonstrating its practical application as a haptic alert system.</li></ul>                                                                        |             |

## CERTIFICATES

---

|                                                          |      |
|----------------------------------------------------------|------|
| • Computer Programming                                   | 2026 |
| • Community Development Project — Nari Gunjan            | 2026 |
| • Community Development Project — Times Foundation x LPU | 2026 |
| • EduPreneur Pitch Fest                                  | 2026 |
| • InfernoVerse 24-hour Hackathon                         | 2026 |

## ACHIEVEMENTS

---

|                                                                                                                                                                                                                                     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Extra-Curricular</b>                                                                                                                                                                                                             |
| <ul style="list-style-type: none"><li>• Secured 2nd position in the EduPreneur Pitch Fest at Lovely Professional University, demonstrating concise idea communication, creativity and pitching ability.</li></ul>                   |
| <b>Hackathon Participation</b>                                                                                                                                                                                                      |
| <ul style="list-style-type: none"><li>• Participated in the InfernoVerse 24-hour Hackathon and other hackathon activities, gaining exposure to collaborative problem-solving, innovation and practical solution building.</li></ul> |
